To whom it may concern.

My name is Mikael Sjöstedt and I am studying Vehicle Engineering for the sixth semester at the Royal Institute of Technology (KTH) in Stockholm. I am hereby applying for an exchange semester at KAIST in the autumn of 2015.

I have chosen to apply to KAIST since I want to study abroad in Asia. I have always been fascinated by the East Asian culture and I have heard great things about KAIST from friends here on KTH.

My friends and family would describe me as an honest, trustworthy and driven person, a person that somehow always manage to find time for everyone in-between a tight schedule of studying, part time job and projects.

I love technology and have a great passion for learning new things. I always have a project at hand. My current one is building a single speed carbon bicycle and in the past I have built everything from a moped to a remote controlled boat.

The reasons for me wanting to study at KAIST are to learn and experience a new culture and I hope to make new friends and perhaps future colleagues.

I hope that this letter has given you a good picture of who I am and see that I am a good fit for the Your university. It would be a great experience to study abroad and I am eager to learn the way of life in a new country.

Sincerely Mikael Sjöstedt
